

Caterpillar Ministries

EPIC COMMUNITY IMPACT PROJECT

“ Aaron was super. He listened and asked questions about Caterpillar and made us think about what was important and what we needed in regards to technology. He made the plan ours!" - Sarah Fortner, ED, Caterpillar Ministries

“ Jackie was terrific. This technology plan came at the most perfect time. Jackie was so influential in achieving the completion and success of this project." - Sarah Fortner, ED, Caterpillar Ministries

Helping the Community and Children of Huntington Green Grow and Thrive

Caterpillar Ministries is currently operating without a technology plan. Technology has not been a main focus for the organization due to limited staff. Caterpillar Ministries was in need of ways to better utilize the technology they already have and a technology plan to better budget and plan for immediate and future technology initiatives. The volunteer team provided a robust technology plan to help the organization further its impact and mission.

Nonprofit Team: Sarah Fortner

Volunteer Team: Aaron Higley

Epic Change Agent: Jackie Gildea

ANTICIPATED COMMUNITY IMPACT

- Mitigate risk in regards to manual data entry
- Increase revenue due to access to data trends
- Enable growth through enhanced data
- Increase operating efficiencies for staff

This project was made possible through the generosity of Missie and T.J. Eberle.

“ This Community Impact Project was incredibly rewarding" - Aaron Higley, Faros Consulting
