

Loaves & Fishes + SoftwareONE

COMMUNITY IMPACT PROJECT SNAPSHOT
PROJECT DELIVERED BY SOFTWAREONE

Providing Nutritionally Balanced Groceries to Those in Need

Problem: Loaves & Fishes recently adopted O365 but was still housing documents and files on an on-premise server. They could not access their files remotely and collaboration was cumbersome.
Solution: Apparo matched L&F to a volunteer team from SoftwareONE who helped migrate them to a SharePoint and OneDrive solution.

Nonprofit Team: Angie Brumer, Shoon Ledyard, Lucy Mitchell, Tina Postel
Volunteer Team: Marco Castro, Jon Nance, Brian Wilson

Helping Feed the Hungry

“ We could not have afforded this without Apparo and SoftwareONE. Even the effort to find the right vendor to do this work would have been a challenge. Now we’ve succeeded and we’re **looking forward to being able to work more efficiently to help feed hungry people.**”

- Tina Postel, Executive Director, Loaves & Fishes

- Anticipated Outcomes + Community Impact
- Increased efficiencies at serving those in need, driven by ability to access information remotely and from multiple devices
 - Decreased costs, which were associated with an on-premise server
 - Increased ability to expand reach through collaboration with nonprofit partners, enabled by more universal platform
 - Increased revenue, driven by development team data management efficiencies
 - Reduced risk of losing data

Humanizing Technology

“Volunteering on a project like this humanizes the impact of technology and the work that we do as technologists. It is a great reminder of the people-side of the tech business and the need to consider and address how people use technology, not just what technology can do.”

- Jon Nance, Manager, General Manager & Sales Director, SoftwareONE
