

## Providing nourishing food, workforce training and wellness services to those in need

**Problem**: In 2019, FeedNC (formerly Mooresville Soup Kitchen) leadership sought a better data management system to support their growth goals.

**Solution**: Apparo matched FeedNC to individual volunteer Johann Vaz to assess their needs and help select the best application to support their goals.

## Outcomes + Community Impact

- Increased efficiency saving 9+ weeks of work time and improving volunteer and guest experience
- Improved fundraising capabilities
- Supported organizational growth plan to expand service offerings, including **goal to increase pantry capacity 5x.**

"Everything about our processes is more efficient now. It has given us so much time back. I am able to focus on our growth plans, including expanding our pantry from one day a week to five. Given the growing demand, we could potentially serve five times as many people."

Lara Ingram

Executive Director, FeedNC
