

Volunteer Spotlight:

Renato Cabral

Capital Market System Engineer,
Wells Fargo

Renato has served two nonprofits in the greater Charlotte area through Community Impact Projects.

Cross Country for Youth: Implemented new system for tracking student data. Saving the organization nearly 100 hours of administrative time per season.

Charlotte Family Housing: Helped optimize organizational efficiency through a business process and Salesforce assessment.

**WELLS
FARGO**

It feels good to contribute to the community in a way that takes advantage of my expertise. I really like the Apparo model, connecting Charlotte business professionals to nonprofits and focusing on delivering very practical, tangible results to them. Apparo gives me opportunities to use skills that I have been building for 25 years to help nonprofits. I have that geek mentality; I really enjoy working to find a technical solution for a real-world problem within a nonprofit budget."

- Renato Cabral

325 Hours \$48,750

Total time and value delivered by volunteer teams across both projects

Today, our ability to report on our results reinforces the longevity of our partnerships. Anyone can say they do something, but not a lot of organizations can prove it. Thanks to Renato's support, we can prove our impact. He has been a tremendous asset to our organization.

- Reggie McAfee, Founder and Executive Director, Cross Country for Youth
