Humane Society of Charlotte + Polypore

SHAREPOINT MIGRATION + TRAINING

POLYPORE
AsahiKASEI

Ensuring animals find "forever homes" and families who will love them for life

ALLEVIATED WORRIES

"We don't have an in-house IT person. Now, I no longer have to worry about whether the server is down and whether people can work. I can focus on bigger things, like our capital campaign to build a new shelter." - Aiko Okamoto, VP of Administration, Humane Society of Charlotte
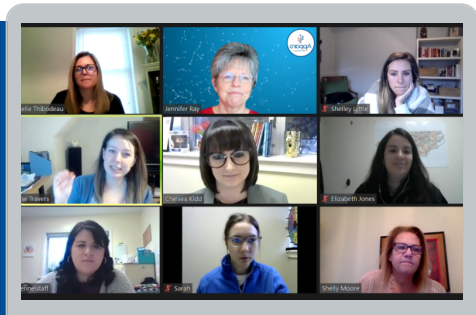

Problem: Humane Society of Charlotte needed a safe, efficient way to work in the cloud in order to collaborate effective and increase their bandwidth towards fulfilling their mission.

Solution: Apparo matched them to a corporate volunteer who set up their SharePoint site, migrated their data and trained their team to ensure successful adoption.

Volunteer: Denise Travers

- Elimination of version control and duplicate file issues
- Secure, large data storage space
- Ability to co-work in real time
- Reduction of internal IT support needs

Anticipated Nonprofit and Community Impact

By improving The Humane Society of Charlotte staff's ability to collaborate and freeing their valuable time, the project helps ensure capital campaign success. As a result, they will able to build their new animal shelter, helping more pets enter and stay in loving homes.

" NOTHING BUT POSITIVE

The Humane Society project was nothing but positive and enjoyable. All of our project-based communications were smooth. I couldn't have asked for an easier group to work with. They are so positive, appreciative and patient with me and my schedule. They are phenomenal people who are willing to learn and very resourceful. It was such a great experience and I'm also so appreciative of Jennifer (Ray, Apparo Program Manager), who pushed us to the finish line." - Denise Travers, Volunteer
